$\textbf{W\bar{a}d\bar{\iota}}$ - a valley / ravine which is dry in certain seasons.

Khawr (lagoon) – a shallow body of water separated from a larger body of water by a land barrier.

Seasonal – a regular point in the year when the weather changes. Some places have several seasons, some have two: wet and dry.

Khor Ruri – a sand fort built along the khawr of the Wādī Darbāt.

Fieldsketch – a skill which geographers use to record the place they are observing. This is usually done out in the field (outdoors).
