

Dear Professor Dame Jane Francis and Professor Joe Smith,

**Re: The response of the Royal Geographical Society to the April 2025 Supreme Court ruling and EHRC interim update**

We are currently witnessing brazen, authoritarian attempts to roll back civil rights in Britain that, if implemented, threaten the very ability of many in the geographical community to work, learn, and participate in public life. We are writing to you as academics and researchers in the geographical community, many of us with expertise in trans lives, LGBTQIA+ lives, sexualities, and gender. We ask that you write, with urgency, on behalf of the Royal Geographical Society (RGS) to the UK Government, the UK Equality and Human Rights Commission (EHRC), and to higher education leaders across the UK, to seek assurances on the inclusion and dignity of trans and gender diverse members of the geographical community and people across the UK in the wake of the Supreme Court's recent [ruling on \*For Women Scotland v The Scottish Ministers\*](#) on 16 April 2025, and the EHRC's [interim update](#) on the "practical implications" of the judgement, published on 25 April.

The Supreme Court ruling of 16 April – that the definition of sex under the Equality Act 2010 refers to "biological sex"<sup>1</sup> – according to former Supreme Court Judge Lord Sumption [does not mandate](#) that trans men and women should be excluded from any space or that organisations should act in a prejudiced way toward trans and gender diverse people. Indeed, trans and gender diverse people remain protected under the Equality Act 2010 against all forms of discrimination under the protected characteristic of "gender reassignment".

However, the EHRC's interim update argues that in workplaces and services open to the public – including schools and universities – trans men and women, and young trans people, should not be permitted to use "single-sex" facilities in their gender, and that the law also allows, "in some circumstances", them to be prohibited from using "single-sex" facilities according to the sex they were assigned at birth. The update also intervenes in the ability of marginalised queer communities, such as spaces for gay men and lesbians, to be trans inclusive, by mandating that "women-only or lesbian only association[s] should not admit trans women [...] and men-only or gay men-only association[s] should not admit trans men." As such, the EHRC's interim update constitutes a grave attack on the entire LGBTQIA+ community.

Furthermore, this update, together with the Supreme Court ruling, defines sex as narrowly as possible: this is deeply harmful to all people (and particularly to women) as it will further police gender and hence curtail all people's (particularly women's) lives.<sup>2</sup>

Peer-reviewed geographical research has demonstrated the harmful impact of the spatialised reinforcement of gender binaries on trans and gender diverse people,<sup>3</sup> and has more specifically

---

<sup>1</sup> "Biological sex" is a complex term; the Supreme Court simply defined it as the sex of a person at birth which appears to mean "sex as initially recorded on one's birth certificate" which, as one interpreter of the Supreme Court ruling has [noted](#), is "a matter of documentation and presumption, rather than actual biology."

evidenced that trans people are already extremely marginalised and hypervisible within UK society, illustrating the devastating everyday impact that this has upon trans people's everyday lives.<sup>4</sup> With our expertise, we are able to say with confidence that this interim update – if implemented – would enormously exacerbate existing inequalities between trans and gender diverse people and cisgender people, establish an unprecedented, legitimised exclusion of trans people from participation in public spaces and public life, and contribute to a crisis of mental ill health within trans communities.

Over the last two weeks, we have witnessed how the ruling and the EHRC's interim update have already intensified transphobia and other forms of hate. Members of the geographical community, including RGS members, are undoubtedly experiencing significant concern about how their dignity and rights will be secured. Indeed, the EHRC's interim update – if implemented – would prohibit trans and gender diverse members of the geographical community from being able to carry out and deliver their research, teaching, and wider everyday lives in dignity and with freedom.

The EHRC is moving at speed: its consultation will open in mid-May and [last for only two weeks](#). We therefore ask that you write as soon as possible to the UK Government and EHRC to:

- State that the EHRC's interpretation of the Supreme Court ruling, evidenced via its interim update, if implemented, would have a devastating impact upon trans and gender diverse individuals and communities, risking trans and gender diverse people's segregation and removal from public life in the UK, noting that both ongoing and peer reviewed published geographical research shows that trans people are already extremely marginalised within UK society.
- Request that trans and gender diverse people are involved in every stage of developing statutory guidance in light of the Supreme Court ruling.

In line with the Society's [principle](#) of working "towards greater equality, diversity and inclusion within its practices and activities as well as across the wider geographical community", and its [commitments](#) to "communicate and promote the role geography and geographers have in promoting equality, diversity and inclusion" and "maximise our convening power across core networks to promote EDI objectives", we also ask that you:

- Publicly re-affirm the Society's commitment to trans inclusion and equality.
- Actively engage with higher education leaders to encourage the protection of trans staff and students' rights and dignity in the workplace at this worrying time for trans communities.
- Make clear that members of the RGS and wider geographical community have expertise in relation to research and teaching relating to trans and gender diverse people – and noting that our research can inform policy and legislative change in related areas.

It is important at this moment that there is publicly accessible evidence of how organisations and individuals are refusing these increasingly bold and discriminatory attacks on trans and gender diverse people. We therefore also ask that the Society publish its communication with EHRC and the UK Government, in addition to a public statement with regards to its ongoing commitment to the inclusion of its trans and gender diverse members.

Yours sincerely
