

Festival impacts: Map interpretation exercise

1:25,000 map extract showing Worthy Farm, the Glastonbury Festival site.

Image from the Ordnance Survey 'Get-a-map service. Reproduced with kind permission from Ordnance Survey/ Ordnance Survey Northern Ireland.

Use the map extract above to answer the questions on the following page.

10 question quiz!

1. What are the names of the two roads close to Worthy Farm which are likely to be severely disrupted by traffic over the festival weekend?

2. The people living at which farm might find it difficult getting in and out during that weekend?

3. What problems do you think may be caused by big water and sewage tankers coming to and fro from the site? Refer to the map in your answer.

4. If the wind was blowing due north during the festival, who might be affected by air and noise pollution?

5. If the wind was blowing strongly to the south / south-west, which natural feature at the bottom of the site might end up with lots of litter in it?

6. Give the compass point of the part of the site least likely to be affected by flooding if there was torrential rain.

7. Approximately how far is it from Worthy Farm (the main farm building at the top) to the main A361 road running through Pilton?

8. If you were trying to leave the site at peak time and crawling along at 0.5km/hour, how long would it take you to get to this main road?

9. Find the name of a road which sounds like it should be 'tidy'!

10. Do you think that this lane will be clean and tidy? Explain your answer!
