

Fab chart toppers **Hi-Impakt** are rehearsing in the UK...

...they fly to the US to record yet another hit single.

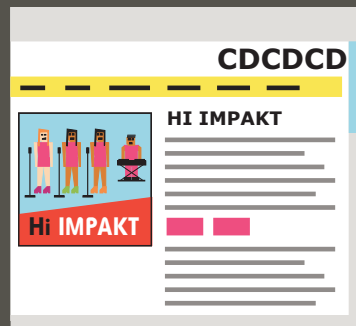

The CDs are made from many different raw materials, including aluminum...

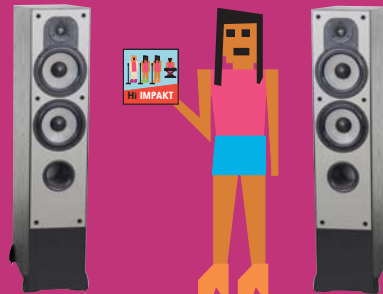

the different materials are processed in a factory...

We buy them in shops or online...

...and play them on our stereos, in our computers, on our...

then they are taken to distribution centres by plane or lorry.

at the packaging plant CDs are put into plastic cases or cardboard packaging...

we make CDs

The CDs are made at the manufacturing plant...

and are driven to another place for production.
