Financial Times in the News: Wildfires

Roval Geographical Society with IBG

Advancing geography and geographical learning

Theme and Specification link

This edition of Financial Times in the News explores the causes, impacts and management of wildfires in the Amazon.

The link to the article can be found here: https://on.ft.com/4gpJLrw or use the QR code in the top right corner of this page.

This article underpins many aspects of carbon within the A Level Specifications specifically:

AQA

3.1.5.6 Fires in nature.

3.1.1.3 Carbon Cycle - changes in the carbon cycle over time, to include natural variation (including wildfires, volcanic activity)

Supporting 3.1.1.6 Case study of a tropical rainforest setting to illustrate and analyse key themes in water and carbon cycles and their relationship to environmental change and human activity.

3.1.6.3 Biomes - human activity and its impact on each biome, typical development issues in each biome to include changes in population, economic development, agricultural extension and intensification, implications for biodiversity and sustainability.

Edexcel

6.3 A balanced carbon cycle is important in sustaining other earth systems but is increasingly altered by human activities.

6.8 There are implications for human wellbeing from the degradation of the water and carbon cycles. .9 Further planetary warming risks large-scale release of stored carbon, requiring responses from different players at different scales.

(Edugas) and WJEC

(2)3.1.7 Carbon stores in different biomes.

(3)4.2.3 Biodiversity under threat.

OCR

3.b The food system is vulnerable to shocks that can impact food security.

Key terms

Use the article and your own knowledge to define the key terms below:

Drought

Extreme weather events

Heatwave

Micro particulate matter

Slash-and-burn

Summary in numbers

Find the related statistic in the article and develop it to add context and summarise the report.

2/3

14 years

34.5mn hectares

40oC

2010

60%

33%

72%

Wider issues

Write a question here to help think about other issues which might influence the points in the article.

Conflict matrix

Using read about the different key players involved from the article then complete the conflict matrix below using the following key:

++ = in complete agreement, + = mostly in agreement, N = neither agree or disagree, - = some disagreement, - - = completely disagree.

Key players	Global wildfire information systems (GWIS)	Inpe	Luiz Inácio Lula da Silva	Pedro Cortes	Ana Paula Cunha	Copernicus	Local farmers
Global wildfire information systems (GWIS)							
Inpe							
Luiz Inácio Lula da Silva							
Pedro Cortes							
Ana Paula Cunha							
Copernicus							
Local farmers							

Justify the most conflicted groups from your conflict matrix.

Synoptic links

Note down any synoptic links using your specification to help you. A Mind map might be helpful here.

> Wildfires in the Amazon

5 examination style questions _____

Assess the conflicting views on managing rainforest ecosystems.

Explain why sustainably managing rainforests on a local scale causes challenges.

Evaluate the possible global impacts of increased forest fires in places such as the Amazon.

Explain the effects on people and the environment in areas affected by reduced water supply such as the Amazon basin.

Examine the role of meteorological phenomena like El Niño and the overheating of the North Atlantic in worsening Brazil's drought and wildfires.
