

## Plastic pollution in the oceans

## **Lesson 2 Discussion Activity**

## Work in groups of four

- First, write a statement to answer each question. Spend a couple of minutes on each.
- Secondly, share your statement with the person sitting next to you.
- Finally, as a group discuss what the broad similarities and differences are between your various viewpoints.

Activity 1: What do you think is the most important thing that needs to be done to bring
about an attitudinal shift that results in <u>all</u> people recognising that <u>all</u> plastic is a resource
that should be recycled or re-used?
that official be recycled of the decat.
A stirite O. Da con thinle it is the management of a second billion to make a second
Activity 2: Do you think it is the government's responsibility to make people and
businesses do more to cut down on plastic waste? Or should citizens do more (both by
