

Hunstanton Cliffs: what Future?

Possible	Probable	Preferable

*Possible: Given current situation, what could possibly happen in the future. This is the broadest option as it involves anything that could happen, even if it is improbable.*

*Probable: Using the most likely of the possible futures, to narrow down to what is most probable.*

*Preferable: What we would prefer to happen. This might represent the most optimistic or realistic of the scenarios that we have, or an alternative, and may be subject to change over time (as are the other options)*
